

# Joomla Production Department, Q3 2020 review by Marco Dings

Please consult the bi-weekly department reports for details on the ongoing operations  
<https://volunteers.joomla.org/departments/production>.

Production department is no exception to being impacted by covid-19. The pandemic is here to stay for some time to come and it is and will be disruptive and affecting the delivery of Joomla4.

Irrespective of the pandemic and limited key-resources production i'm proud of the team and contributors to get us to the fourth beta for Joomla!4.

We have started the roadmap beyond Joomla4 and have appointed a release lead for J!4.1 and a way of working for a timeboxed release of subsequent release.

A more intense collaboration with the newly led marketing department has been set up and starting to bear fruits.

On a personal note medical issues (leading into Q4) have limited my available commitment. I'm happy to see that Llewellyn as appointed ADC was able to step up and fill the gap

Marco Dings
