

Joomla Production Department, Q4 2020 review by Marco Dings

Please consult the bi-weekly department reports for details on the ongoing operations <https://volunteers.joomla.org/departments/production>.

2020 has proven a mixed bag of blessings.

Personally, the last quarter has proven a bit of a challenge healthwise and I'm grateful for Llewellyn van der Merwe helping Out as assistant DC. And on a generic note while this report is to be also a reflection of me as DC, there are very little solo actions, as we succeed by collaborating.

Irrespective of the pandemic production has made good progress and Joomla 4 is on the horizon in the beginning of 2021 at which point we can start focussing on the described technical and marketing roadmap.

2020 has also been the year where we see the beginning of an increasing level of professionalism and Cooperation with other departments on practicalities as translations and j4 landing site development and engaging new volunteers.

On the site of extending our support base with companies and developers as mentioned in my charter we are seeing the first signs of commitment of which I hope to report more next year.

Marco Dings
